

ALV8 Weight 102 Kgs
Excel Angle Lock Milling Vice
3-106-300

Product details

- Made of high quality ductile iron 8000 PSI for minimum distortion.
- The enclosed lead screw and sliding surface are hardened and ground.
- Highest clamping power.
- It is very accurate and durable.
- This vice is so designed that the horizontal force generated by tightening the handle pushes the semi-sphere within the moveable jaw and thus thrusts the moveable jaw downward.
- Therefore, the workpiece does not move up, even if it is held at the top of the jaw plates.
- Swivel base is graduated through 360 degs.
